

Revenue and Rating Plan 2021 to 2025

Approval Body:	Council
Endorsement Date:	29 June 2021
Current Version:	<p>Previous Revenue and Rating <u>Strategy</u> adopted by Council on 28 June 2017</p> <p>Council policy documents change from time to time and it is recommended that you consult the electronic reference copy on Casey Council's Website to ensure that you have the current version. Alternatively, you may contact Customer Service on 9705 5200.</p>
Council Plan Reference:	Become a Future-Ready Organisation – Create an adaptable, innovative and financially sustainable operating model that delivers maximum community benefit (to be confirmed)
Compulsory Review Cycle:	Every four years.
Review Date:	<p>30 June 2025</p> <p>It is recognised that, from time to time, circumstances may change leading to the need for minor administrative changes to this document. Where an update does not materially alter this document, such a change may be made administratively.</p> <p>Examples include a change to the name of a Council department, a change to the name of a Federal or State Government department, and a minor update to legislation which does not have a material impact. However, any change or update which materially alters this document must be by resolution of Council.</p>
Responsible Department:	Finance and Rates
Relevant Legislation:	Section 93 of the <i>Local Government Act 2020</i>
Relevant Council Documents:	Annual Budget and Financial Plan
ECM ID:	

1. Definitions

Key term	Definition
Council	means Casey City Council, being a body corporate constituted as a municipal Council under the Local Government Act 1989
Councillors	means the individuals holding the office of a member of Casey City Council
Council officer	means the Chief Executive Officer and staff of Council appointed by the Chief Executive Officer.
Strategy	A long-term (3 to 5 year) description of Council will achieve an objective.
Annual Action Plan	An annual plan of how to progress the strategy in the specified year.

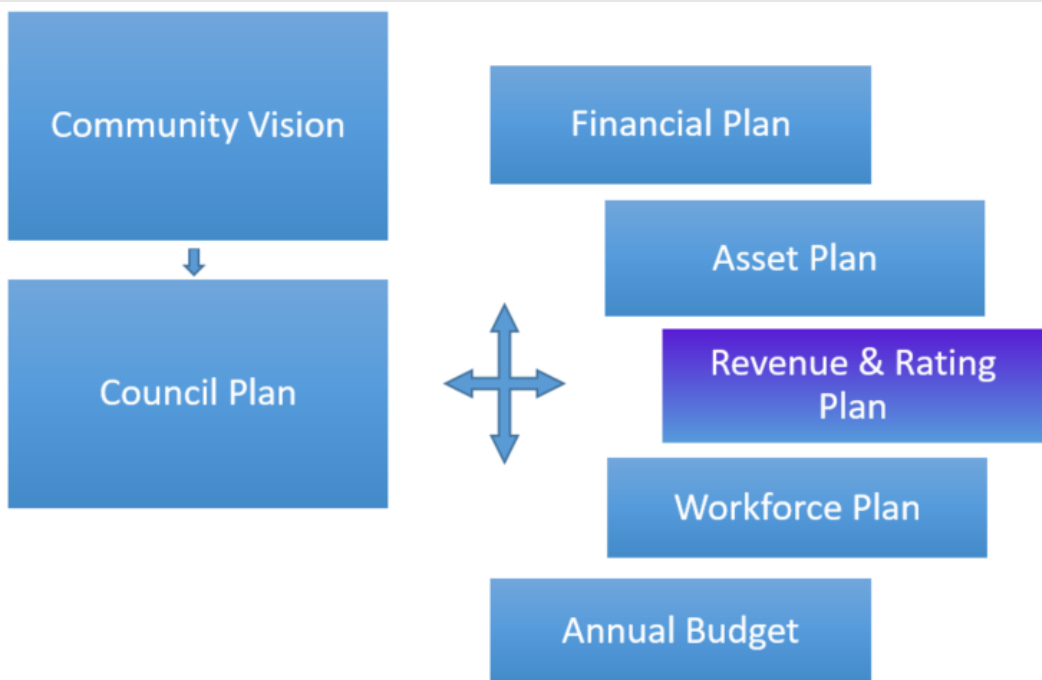

2. Purpose and Intent

The *Local Government Act 2020* requires each council to prepare a Revenue and Rating Plan to cover a minimum period of four years following each Council election. The Revenue and Rating Plan establishes the revenue raising framework within which the Council proposes to work.

The purpose of the Revenue and Rating Plan is to determine the most appropriate and affordable revenue and rating approach for the City of Casey which in conjunction with other income sources will adequately finance the objectives in the council plan.

This plan is an important part of Council’s integrated planning framework, all of which is created to help Council achieve its vision to become a more connected, bold and resilient community.

Strategies outlined in this plan align with the objectives contained in the Council Plan and will feed into our budgeting and long-term financial planning documents, as well as other strategic planning documents under our Council’s strategic planning framework.

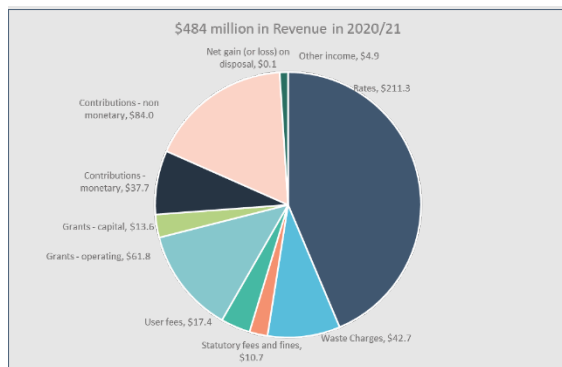

This plan will explain how Council calculates the revenue needed to fund its activities, and how the funding burden will be apportioned between ratepayers and other users of Council facilities and services.

In particular, this plan will set out decisions that Council has made in relation to rating options available to it under the *Local Government Act 2020* to ensure the fair and equitable distribution of rates across property owners. It will also set out principles that are used in decision making for other revenue sources such as fees and charges.

It is also important to note that this plan does not set revenue targets for Council, it outlines the strategic framework and decisions that inform how Council will go about calculating and collecting its revenue.

3. Introduction

Council provides a number of services and facilities to our local community, and in doing so, must collect revenue to cover the cost of providing these services and facilities.

Council's revenue sources include:

- Rates and Charges
- Waste and garbage charges
- Grants from other levels of Government
- Statutory Fees and Fines
- User Fees
- Cash and non-cash contributions from other parties (ie developers, community groups)
- Interest from investments
- Sale of Assets

Rates are the most significant revenue source for Council and make up over 50 per cent of its annual income.

The introduction of rate capping under the Victorian Government's Fair Go Rates System (FGRS) has brought a renewed focus to Council's long-term financial sustainability. The FGRS continues to restrict Council's ability to raise revenue above the rate cap unless application is made to the Essential Services Commission for a variation. Council is committed to financial sustainability in the management of the community's assets and in the delivery of services to the community. This strategy will address Council's reliance on rate income and provide options to actively reduce that reliance.

Council provides a wide range of services to the community, often for a fee or charge. The nature of these fees and charges generally depends on whether they relate to statutory or discretionary services. Some of these, such as statutory planning fees are set by State Government statute and are commonly known as regulatory fees. In these cases, councils usually have no control over service pricing. However, in relation to other services, Council has the ability to set a fee or charge and will set that fee based on the principles outlined in this Revenue and Rating Plan.

Council revenue can also be adversely affected by changes to funding from other levels of government. Some grants are tied to the delivery of council services, whilst many are tied directly to the delivery of new community assets, such as roads or sports pavilions. It is important for Council to be clear about what grants it intends to apply for, and the obligations that grants create in the delivery of services or infrastructure.

4. Community Engagement

The Revenue and Rating Plan outlines Council's decision-making process on how revenues are calculated and collected. The following public consultation process will be/was followed to ensure due consideration and feedback is received from relevant stakeholders.

Revenue and Rating Plan community engagement process:

- Shape Your City engagement on community priorities 14 September to 30 October 2020
- Draft Revenue and Rating Plan prepared by officers
- Deliberative engagement as part of Shape Your City on 27 March 2021
- Draft Revenue and Rating Plan placed on public exhibition at 18 May 2021 Council meeting and calling for public submissions
- Hearing of public submissions 8 June 2021
- Revenue and Rating Plan presented to Council meeting for adoption on 29 June 2021.

5. Rates and Charges

Rates are property taxes that allow Council to raise revenue to fund essential public services to cater to their municipal population. Importantly, it is a taxation system that includes flexibility for councils to utilise different tools in its rating structure to accommodate issues of equity and to ensure fairness in rating for all ratepayers.

Council has established a rating structure comprised of two key elements. These are:

- General Rates – Based on property values (using the Capital Improved Valuation methodology), which are indicative of capacity to pay and form the central basis of rating under the Local Government Act
- Service Charges - A 'user pays' component for council services to reflect benefits provided by Council to ratepayers who benefit from a service

Striking a proper balance between these elements will help to improve equity in the distribution of the rate burden across residents.

The City of Casey applies a uniform rating structure and does not levy a municipal charge.

The formula for calculating General Rates, excluding any additional charges, arrears or additional supplementary rates is:

$$\text{Valuation (Capital Improved Value)} \times \text{Rate in the Dollar}$$

The rate in the dollar for each rating differential category is included in Council's annual budget.

Rates and charges are an important source of revenue, accounting for over 50 per cent of operating revenue received by Council. The collection of rates is an important factor in funding Council services.

Planning for future rate increases is therefore an essential component of the long-term financial planning process and plays a significant role in funding both additional service delivery and the increasing costs related to providing Council services.

Council is aware of the balance between rate revenue (as an important income source) and community sensitivity to rate increases. With the introduction of the State Government's Fair Go Rates System, all rate increases are capped to a rate declared by the Minister for Local Government, which is announced in December for the following financial year.

Council currently utilises a service charge to fully recover the cost of Council's waste services and provide for future landfill rehabilitation costs. The garbage service charge is not capped under the Fair Go Rates System, and Council will continue to allocate surplus funds from this charge towards the provision of waste services.

6. Rating Legislation

The legislative framework set out in the *Local Government Act 1989* and *Local Government Act 2020* determines council's ability to develop a rating system. The framework provides significant flexibility for Council to tailor a system that suits its needs.

Section 155 of the *Local Government Act 1989* provides that a Council may declare the following rates and charges on rateable land:

- General rates under Section 158
- Municipal charges under Section 159
- Service rates and charges under Section 162
- Special rates and charges under Section 163

The recommended strategy in relation to municipal charges, service rates and charges and special rates and charges are discussed later in this document.

In raising Council rates, Council is required to primarily use the valuation of the rateable property to levy rates. Section 157 (1) of the *Local Government Act 1989* provides Council with three choices in terms of which valuation base to utilise. They are: Site Valuation, Capital Improved Valuation (CIV) and Net Annual Value (NAV).

The advantages and disadvantages of the respective valuation basis are discussed further in this document. Whilst this document outlines Council's strategy regarding rates revenue, rates data will be contained in the Council's Annual Budget as required by the *Local Government Act 2020*.

Section 94(2) of the *Local Government Act 2020* states that Council must adopt a budget by 30 June each year (or at another time fixed by the Minister) to include:

- a) the total amount that the Council intends to raise by rates and charges;
- b) a statement as to whether the rates will be raised by the application of a uniform rate or a differential rate;
- c) a description of any fixed component of the rates, if applicable;
- d) if the Council proposes to declare a uniform rate, the matters specified in section 160 of the *Local Government Act 1989*;
- e) if the Council proposes to declare a differential rate for any land, the matters specified in section 161(2) of the *Local Government Act 1989*;

Section 94(3) of the *Local Government Act 2020* also states that Council must ensure that, if applicable, the budget also contains a statement –

- a) that the Council intends to apply for a special order to increase the Council's average rate cap for the financial year or any other financial year; or
- b) that the Council has made an application to the ESC for a special order and is waiting for the outcome of the application; or
- f) that a special Order has been made in respect of the Council and specifying the average rate cap that applies for the financial year or any other financial year.

This plan outlines the principles and strategic framework that Council will utilise in calculating and distributing the rating burden to property owners, however, the quantum of rate revenue and rating differential amounts will be determined in the annual Victorian City Council budget.

In 2019 the Victorian State Government conducted a Local Government Rating System Review. The Local Government Rating System Review Panel presented their final report and list of recommendations to the Victorian Government in March 2020. The Victorian Government subsequently published a response to the recommendations of the Panel's report. However, at the time of publication the recommended changes have not yet been implemented, and timelines to make these changes have not been announced.

Details of the review can be found here:

<https://www.localgovernment.vic.gov.au/council-governance/victorian-local-government-rating-system-review>

7. Rating Principles

Taxation Principles:

When developing a rating strategy, in particular with reference to differential rates, a Council should give consideration to the following good practice taxation principles:

- Wealth Tax
- Equity
- Efficiency
- Simplicity
- Benefit
- Capacity to Pay
- Diversity.

Wealth Tax

The “wealth tax” principle implies that the rates paid are dependent upon the value of a ratepayer’s real property and have no correlation to the individual ratepayer’s consumption of services or the perceived benefits derived by individual ratepayers from the expenditures funded from rates.

Equity

Horizontal equity – ratepayers in similar situations should pay similar amounts of rates (ensured mainly by accurate property valuations, undertaken in a consistent manner, their classification into homogenous property classes and the right of appeal against valuation).

Vertical equity – those who are better off should pay more rates than those worse off (the rationale applies for the use of progressive and proportional income taxation. It implies a “relativity” dimension to the fairness of the tax burden).

Efficiency

Economic efficiency is measured by the extent to which production and consumption decisions by people are affected by rates.

Simplicity

How easily a rates system can be understood by ratepayers and the practicality and ease of administration.

Benefit

The extent to which there is a nexus between consumption/benefit and the rate burden.

Capacity to Pay

The capacity of ratepayers or groups of ratepayers to pay rates.

Diversity

The capacity of ratepayers within a group to pay rates.

The rating challenge for Council therefore is to determine the appropriate balancing of competing considerations.

Rates and Charges Revenue Principles:

Property rates will:

- be reviewed annually;
- not change dramatically from one year to next; and
- be sufficient to fund current expenditure commitments and deliverables outlined in the Council Plan, Financial Plan and Asset Plan.

8. Determining which Valuation Base to Use

Under the *Local Government Act 1989*, Council has three options as to the valuation base it elects to use. They are:

- Capital Improved Value (CIV) – Value of land and improvements upon the land.
- Site Value (SV) – Value of land only.
- Net Annual Value (NAV) – Rental valuation based on CIV.

Capital Improved Value (CIV)

Capital Improved Value is the most commonly used valuation base by local government with over 90% of Victorian councils applying this methodology. Based on the value of both land and all improvements on the land, it is generally easily understood by ratepayers as it equates to the market value of the property.

Section 161 of the *Local Government Act 1989* provides that a Council may raise any general rates by the application of a differential rate if –

- a) It uses the capital improved value system of valuing land; and
- b) It considers that a differential rate will contribute to the equitable and efficient carrying out of its functions.

Where a council does not utilise CIV, it may only apply limited differential rates in relation to farm land, urban farm land or residential use land.

Advantages of using Capital Improved Value (CIV)

- CIV includes all property improvements, and hence is often supported on the basis that it more closely reflects “capacity to pay”. The CIV rating method takes into account the full development value of the property, and hence better meets the equity criteria than Site Value and NAV.
- With the increased frequency of valuations (previously two year intervals, now annual intervals) the market values are more predictable and has reduced the level of objections resulting from valuations.
- The concept of the market value of property is more easily understood with CIV rather than NAV or SV.
- Most councils in Victoria have now adopted CIV which makes it easier to compare relative movements in rates and valuations across councils.
- The use of CIV allows council to apply differential rates which greatly adds to council’s ability to equitably distribute the rating burden based on ability to afford council rates. CIV allows council to apply higher rating differentials to the commercial and industrial sector that offset residential rates.

Disadvantages of using CIV

- The main disadvantage with CIV is the fact that rates are based on the total property value which may not necessarily reflect the income level of the property owner as with pensioners and low-income earners.

Site value (SV)

There are currently no Victorian councils that use this valuation base. With valuations based simply on the valuation of land and with only very limited ability to apply differential rates, the implementation of Site Value in a Victorian City Council context would cause a shift in rate burden from the industrial/commercial sectors onto the residential sector, and would hinder council’s objective of a fair and equitable rating system.

There would be further rating movements away from modern townhouse style developments on relatively small land parcels to older established homes on quarter acre residential blocks. In many ways, it is difficult

to see an equity argument being served by the implementation of site valuation in the Victorian City Council.

Advantages of Site Value

- There is a perception that under site value, a uniform rate would promote development of land, particularly commercial and industrial developments. There is, however, little evidence to prove that this is the case.
- Scope for possible concessions for urban farm-land and residential use land.

Disadvantages of using Site Value

- Under SV, there will be a significant shift from the industrial/commercial sector onto the residential sector of council. The percentage increases in many cases would be in the extreme range.
- SV is a major burden on property owners that have large areas of land. Some of these owners may have much smaller/older dwellings compared to those who have smaller land areas but well developed dwellings - but will pay more in rates. A typical example is flats, units, or townhouses which will all pay low rates compared to traditional housing styles.
- The use of SV can place pressure on council to give concessions to categories of landowners on whom the rating burden is seen to fall disproportionately (eg. farm land and residential use properties). Large landowners, such as farmers for example, are disadvantaged by the use of site value.
- SV will reduce Council's rating flexibility and options to deal with any rating inequities due to the removal of the ability to levy differential rates.
- The community may have greater difficulty in understanding the SV valuation on their rate notices, as indicated by many inquiries from ratepayers on this issue handled by council's customer service and property revenue staff each year.

Net annual value (NAV)

NAV, in concept, represents the annual rental value of a property. However, in practice, NAV is loosely linked to capital improved value for residential and farm properties. Valuers derive the NAV directly as 5 per cent of CIV.

In contrast to the treatment of residential and farm properties, NAV for commercial and industrial properties are assessed with regard to actual market rental. This differing treatment of commercial versus residential and farm properties has led to some suggestions that all properties should be valued on a rental basis.

Overall, the use of NAV is not largely supported. For residential and farm ratepayers, actual rental values pose some problems. The artificial rental estimate used may not represent actual market value, and means the base is the same as CIV but is harder to understand.

Recommended valuation base

In choosing a valuation base, councils must decide on whether they wish to adopt a differential rating system (different rates in the dollar for different property categories) or a uniform rating system (same rate in the dollar). If a council was to choose the former, under the *Local Government Act 1989* it must adopt either of the CIV or NAV methods of rating.

The City of Casey applies a uniform rating system using the Capital Improved Value (CIV) method to all properties within the municipality to take into account the fully developed value of the property. This basis of valuation takes into account the total market value of the land plus buildings and other improvements.

Property Valuations

The *Valuation of Land Act 1960* is the principle legislation in determining property valuations. Under the Valuation of Land Act 1960, the Victorian Valuer-General conducts property valuations on an annual basis. Victorian City Council applies a Capital Improved Value (CIV) to all properties within the municipality to take into account the full development value of the property. This basis of valuation takes into account the total market value of the land including buildings and other improvements.

The value of land is always derived by the principal of valuing land for its highest and best use at the relevant time of valuation.

Supplementary Valuations

Supplementary valuations are carried out for a variety of reasons including rezoning, subdivisions, amalgamations, renovations, new constructions, extensions, occupancy changes and corrections. The Victorian Valuer-General is tasked with undertaking supplementary valuations and advises council on a monthly basis of valuation and Australian Valuation Property Classification Code (AVPCC) changes.

Supplementary valuations bring the value of the affected property into line with the general valuation of other properties within the municipality. Objections to supplementary valuations can be lodged in accordance with Part 3 of the *Valuation of Land Act 1960*. Any objections must be lodged with Council within two months of the issue of the supplementary rate notice.

Objections to property valuations

Part 3 of the *Valuation of Land Act 1960* provides that a property owner may lodge an objection against the valuation of a property or the Australian Valuation Property Classification Code (AVPCC) within two months of the issue of the original or amended (supplementary) Rates and Valuation Charges Notice (Rates Notice), or within four months if the notice was not originally issued to the occupier of the land.

A property owner must lodge their objection to the valuation or the AVPCC in writing to the City of Casey. Property owners also have the ability to object to the site valuations on receipt of their Land Tax Assessment. Property owners can appeal their land valuation within two months of receipt of their Council Rate Notice (via Council) or within two months of receipt of their Land Tax Assessment (via the State Revenue Office).

9. Rating System – Uniform Rating or Differential Rating

The City of Casey has considered the options of uniform and differential rating. Differential rating allows (under the CIV method) council to shift part of the rate burden from some groups of ratepayers to others, through different “rates in the dollar” for each class of property.

The advantages of utilising a differential rating system summarised below are:

- There is greater flexibility to distribute the rate burden between all classes of property, and therefore link rates with the ability to pay and reflecting the tax deductibility of rates for commercial and industrial premises.
- Differential rating allows Council to better reflect the investment required by Council to establish infrastructure to meet the needs of the commercial and industrial sector.
- Allows Council to reflect the unique circumstances of some rating categories where the application of a uniform rate may create an inequitable outcome (eg. Farming enterprises).
- Allows Council discretion in the imposition of rates to facilitate and encourage appropriate development of its municipal district in the best interest of the community. (ie. Vacant Commercial properties still attract the commercial differential rate)

The disadvantages in applying differential rating summarised below are:

- The justification of the differential rate can at times be difficult for the various groups to accept giving rise to queries and complaints where the differentials may seem to be excessive.
- Differential rates can be confusing to ratepayers, as they may have difficulty understanding the system. Some rating categories may feel they are unfavourably treated because they are paying a higher level of rates than other ratepayer groups.
- Differential rating involves a degree of administrative complexity as properties continually shift from one type to another (e.g. residential to commercial,) requiring Council to update its records. Ensuring the accuracy/integrity of Council’s data base is critical to ensure that properties are correctly classified into their right category.
- Council may not achieve the objectives it aims for through differential rating. For example, Council may set its differential rate objectives to levy a higher rate on land not developed, however it may be difficult to prove whether the rate achieves those objectives.

Council has considered various options and will continue to use a uniform rate on the basis of CIV base as it best conforms to the wealth tax principle and is the most transparent and easily understood.

Council continues to offer a limited number of rate rebates and concessions to various rate payers where property classes and individual ratepayers would have difficulty meeting their obligations because of their capacity to pay rates, in particular ratepayers who receive a rebate are eligible pensioners (State Government Funded), eligible gold card holders.

10. Potential to Apply a Municipal Charge

Another principle rating option available to Councils is the application of a municipal charge. Under Section 159 of the *Local Government Act 1989*, Council may declare a municipal charge to cover some of the administrative costs of the Council. The legislation is not definitive on what comprises administrative costs and does not require Council to specify what is covered by the charge.

The application of a municipal charge represents a choice to raise a portion of the rates by a flat fee for all properties, rather than sole use of the CIV valuation method.

Under the *Local Government Act 1989*, a council's total revenue from a municipal charge in a financial year must not exceed 20 per cent of the combined sum total of the Council's total revenue from the municipal charge and the revenue from general rates (total rates).

Council has resolved not to impose a municipal charge as it is regressive in that it would apply equally to all properties.

11. Special Charge Schemes

The *Local Government Act 1989* recognises that councils need help to provide improved infrastructure for their local communities. Legislation allows councils to pass on the cost of capital infrastructure to the owner of a property that generally receives a unique benefit from the construction works. The technical explanation of a Special Charge comes from legislation (under the *Local Government Act 1989*) that allows councils to recover the cost of works from property owners who will gain special benefit from that work.

The purposes for which special rates and special charges may be used include road construction, kerb and channelling, footpath provision, drainage, and other capital improvement projects.

The special rate or special charges may be declared on the basis of any criteria specified by the council in the rate (Section 163 (2)). In accordance with Section 163 (3), council must specify:

- a. the wards, groups, uses or areas for which the special rate or charge is declared; and
- b. the land in relation to which the special rate or special charge is declared;
- c. the manner in which the special rate or special charge will be assessed and levied; and
- d. details of the period for which the special rate or special charge remains in force.

The special rates and charges provisions are flexible and can be used to achieve a wide range of community objectives. The fundamental principle of special rates and charges is proof "special benefit" applies to those being levied. For example, they could be used to fund co-operative fire prevention schemes. This would ensure that there were no 'free-riders' reaping the benefits but not contributing to fire prevention.

Landscaping and environmental improvement programs that benefit small or localised areas could also be funded using special rates or charges.

The City of Casey adopts its own Special Charge Scheme Policy available on Council's website.

12. Service Rates and Charges

Section 162 of the *Local Government Act 1989* provides council with the opportunity to raise service rates and charges for any of the following services:

- a. The provision of a water supply;
- b. The collection and disposal of refuse;
- c. The provision of sewage services;
- d. Any other prescribed service.

Council currently applies a service charge for the collection and disposal of refuse on urban properties (compulsory) and rural properties (optional) and providing waste services for the municipality (street litter bins for instance). Council retains the objective of setting the service charge for waste at a level that fully recovers the cost of the waste services, including providing for the cost of rehabilitation of the council's landfill once it reaches the end of its useful life.

It is recommended that council retain the existing waste service charge – should council elect not to have a waste service charge, this same amount would be required to be raised by way of an increased general rate – meaning that residents in higher valued properties would substantially pay for the waste service of lower valued properties.

Whilst this same principle applies for rates in general, the mix of having a single fixed charge combined with valuation driven rates for the remainder of the rate invoice provides a balanced and equitable outcome.

13. Collection and Administration of Rates and Charges

The purpose of this section is to outline the rate payment options, processes, and the support provided to ratepayers facing financial hardship.

Payment options

In accordance with section 167(1) of the *Local Government Act 1989* ratepayers have the option of paying rates and charges by way of four instalments. Payments are due on the prescribed dates below:

- 1st Instalment: 30 September
- 2nd Instalment: 30 November
- 3rd Instalment: 28 February
- 4th Instalment: 31 May

Council also provides for nine monthly instalments through a monthly direct debit arrangement commencing in September and concluding in May.

Council offers a range of payment options including:

- online via Council's ratepayer portal, direct debit (on prescribed instalment due dates or monthly),
- BPAY,
- in person at Council offices (cheques, money orders, EFTPOS, credit/debit cards and cash),
- Australia Post (over the counter, over the phone via credit card and on the internet),
- by mail (cheques and money orders only).

Interest on arrears and overdue rates

Interest is charged on all overdue rates in accordance with Section 172 of the *Local Government Act 1989*. The interest rate applied is fixed under Section 2 of the *Penalty Interest Rates Act 1983*, which is determined by the Minister and published by notice in the Government Gazette.

Pensioner rebates

Holders of a Centrelink or Veteran Affairs Pension Concession card or a Veteran Affairs Gold card which stipulates Totally and Permanently Incapacitated pension or War Widow may claim a rebate on their sole or principal place of residence. Upon initial application, ongoing eligibility is maintained, unless rejected by Centrelink or the Department of Veteran Affairs during the annual verification procedure. Upon confirmation of an eligible pensioner concession status, the pensioner rebate is deducted from the rate account before payment is required by the ratepayer.

With regards to new applicants, after being granted a Pensioner Concession Card (PCC), pensioners can then apply for the rebate at any time throughout the rating year. Retrospective claims up to a maximum of one previous financial year can be approved by Council on verification of eligibility criteria, for periods prior to this claims may be approved by the relevant government department.

Deferred payments

Rate Payment and Financial Hardship Policy

It is acknowledged at the outset that various ratepayers may experience financial hardship for a whole range of issues and that meeting rate obligations constitutes just one element of a number of difficulties that may be faced. The purpose of the Rate Payment and Financial Hardship Policy is to provide options for ratepayers facing such situations to deal with the situation positively and reduce the strain imposed by financial hardship. Ratepayers may elect to either negotiate a rate payment plan or apply for a rate deferral.

Under Section 170 of the *Local Government Act 1989*, Council may defer the payment of any rate or charge for an eligible ratepayer whose property is their sole place of residency, allowing ratepayers an extended period of time to make payments or alternatively to forestall payments on an indefinite basis until the ratepayer ceases to own or occupy the land in respect of which rates and charges are to be levied.

Deferral of rates and charges are available to all ratepayers who satisfy the eligibility criteria and have proven financial difficulties. Where Council approves an application for deferral of rates or charges, interest will continue to be levied on the outstanding balance of rates and charges but at an interest rate fixed annually by Council. This deferred interest rate will typically be well under the penalty interest rate levied by Council on unpaid rates and charges.

Ratepayers seeking to apply for assistance are required to submit an "Application for Assistance Due to Financial Hardship" form for their eligibility to be assessed. This form is available by download from Council's website, is also available at the council offices, or can be posted upon request.

Debt recovery

Council makes every effort to contact ratepayers at their correct address but it is the ratepayers' responsibility to properly advise Council of their contact details. Section 230 and 231 of the *Local Government Act 1989* requires both the vendor and buyer of property, or their agents (e.g. solicitors and or conveyancers), to notify Council by way of notice of disposition or acquisition of an interest in land.

In the event that an account becomes overdue, Council will issue an overdue reminder notice which will include accrued penalty interest. In the event that the account remains unpaid, Council may take legal action without further notice to recover the overdue amount. All fees and court costs incurred will be recoverable from the ratepayer.

If an amount payable by way of rates in respect to land has been in arrears for three years or more, Council may take action to sell the property in accordance with Section 181 of the *Local Government Act 1989*.

The debt recovery process is outlined in the Rate Payment and Financial Hardship Policy.

Fire Services Property Levy

In 2016 the Victorian State Government passed legislation requiring the Fire Services Property Levy to be collected from ratepayers. Previously this was collected through building and property insurance premiums. The Fire Services Property Levy helps fund the services provided by the Metropolitan Fire Brigade (MFB) and Country Fire Authority (CFA), and all levies collected by Council are passed through to the State Government.

The Fire Services Property Levy is based on two components, a fixed charge, and a variable charge which is linked to the Capital Improved Value of the property. This levy is not included in the rate cap and increases in the levy are at the discretion of the State Government.

14. USER FEES AND CHARGES

User fees and charges are those that Council will charge for the delivery of services and use of community infrastructure.

Examples of user fees and charges include:

- Kindergarten and Childcare fees
- Leisure Centre, Gym, and Pool visitation and membership fees
- Aged and Health Care service fees
- Leases and facility hire fees

The provision of infrastructure and services form a key part of council's role in supporting the local community. In providing these, council must consider a range of 'Best Value' principles including service cost and quality standards, value-for-money, and community expectations and values. Council must also balance the affordability and accessibility of infrastructure and services with its financial capacity and in the interests of long-term financial sustainability.

Councils must also comply with the Government's Competitive Neutrality Policy for significant business activities they provide and adjust their service prices to neutralise any competitive advantages when competing with the private sector.

In providing services to the community, council must determine the extent of cost recovery for particular services consistent with the level of both individual and collective benefit that the services provide and in line with the community's expectations.

The nature of Council's fees and charges generally depends on whether they relate to compulsory or discretionary services. Some of these, such as statutory planning fees, are set by state government statute and are commonly known as 'regulatory fees'. In these cases, councils' usually have no control over service pricing.

The *Local Government Act 1989* gives Council the power to set these fees and charges at a level that recovers the full cost of providing the services, unless there is an overriding policy or imperative in favour of subsidisation.

Council periodically reviews all fees and charges and adjusts the levels consistent with application of the user pays principle – that is, so far as is possible, the cost of providing a direct service will be met by the fees charged.

A rolling review process for all service areas is to be undertaken that ensures all service areas are subject to review on a regular basis.

All council services can be reviewed to assess whether they are appropriate to attract user fees and charges. Attributes of a service that can affect the ability for a council to place a fee or charge include whether the operation is a public or private good in nature and if there is any state and federal government legislation or funding conditions prohibiting or setting ceilings for pricing.

Council has developed a range of principles to determine the level of fees and charges to be applied to each service. These principles are:

- Fees and charges are set in line with other like services through benchmarking.
- Fees and charges are set at a level that is deemed to be fair and equitable to enable the majority of residents to access the services.
- No fees (or low fees) are charged to encourage participation and positive health and wellbeing outcomes.
- Fees are charged in line with State or Federal government legislation or Local Laws
- Fees are charged in line with State or Federal government funding requirements

As per the Victorian Auditor General's Office report "Fees and charges – cost recovery by local government" recommendations, council has developed a user fee pricing policy to help guide the fair and equitable setting of prices. The policy outlines the process for setting fee prices and includes such principles as:

- Both direct and indirect costs to be taken into account when setting prices;
- Accessibility, affordability and efficient delivery of services must be taken into account; and
- Competitive neutrality with commercial providers.

Council will develop a table of fees and charges as part of its annual budget each year. Proposed pricing changes will be included in this table and will be communicated to stakeholders before the budget is adopted, giving them the chance to review and provide valuable feedback before the fees are locked in.

15. Statutory Fees and Fines

Statutory fees and fines are those which council collects under the direction of legislation or other government directives. The rates used for statutory fees and fines are generally advised by the state government department responsible for the corresponding services or legislation, and generally councils will have limited discretion in applying these fees.

Examples of statutory fees and fines include:

- Planning and subdivision fees
- Building and Inspection fees
- Infringements and fines
- Land Information Certificate fees

Penalty and fee units are used in Victoria's Acts and Regulations to describe the amount of a fine or a fee.

Penalty units

Penalty units are used to define the amount payable for fines for many offences. For example, the fine for selling a tobacco product to a person aged under 18 is four penalty units.

One penalty unit is currently \$165.22, from 1 July 2020 to 30 June 2021.

The rate for penalty units is indexed each financial year so that it is raised in line with inflation. Any change to the value of a penalty unit will happen on 1 July each year.

Fee units

Fee units are used to calculate the cost of a certificate, registration or licence that is set out in an Act or Regulation. For example, the cost of depositing a Will with the supreme court registrar of probates is 1.6 fee units.

The value of one fee unit is currently \$14.81. This value may increase at the beginning of a financial year, at the same time as penalty units.

The cost of fees and penalties is calculated by multiplying the number of units by the current value of the fee or unit. The exact cost may be rounded up or down.

16. Grants

Grant revenue represents income usually received from other levels of government. Some grants are singular and attached to the delivery of specific projects, whilst others can be of a recurrent nature and may or may not be linked to the delivery of projects.

Council will pro-actively advocate to other levels of government for grant funding support to deliver important infrastructure and service outcomes for the community. Council may use its own funds to leverage higher grant funding and maximise external funding opportunities.

When preparing its financial plan, council considers its project proposal pipeline, advocacy priorities, upcoming grant program opportunities, and co-funding options to determine what grants to apply for. Council will only apply for and accept external funding if it is consistent with the Community Vision and does not lead to the distortion of Council Plan priorities.

Grant assumptions are then clearly detailed in council's budget document. No project that is reliant on grant funding will proceed until a signed funding agreement is in place.

17. Contributions

Contributions represent funds received by council, usually from non-government sources, and are usually linked to projects. Contributions can be made to council in the form of either cash payments or asset hand-overs. Examples of contributions include:

- Monies collected from developers under planning and development agreements
- Monies collected under developer contribution plans and infrastructure contribution plans
- Contributions from user groups towards upgrade of facilities
- Assets handed over to council from developers at the completion of a subdivision, such as roads, drainage, and streetlights.

Contributions should always be linked to a planning or funding agreement. Council will not undertake any work on a contribution-funded project until a signed agreement outlining the contribution details is in place.

Contributions linked to developments can be received well before any council expenditure occurs. In this situation, the funds will be identified and held separately for the specific works identified in the agreements.

18. Interest on Investments

Council receives interest on funds managed as part of its investment portfolio, where funds are held in advance of expenditure, or for special purposes. The investment portfolio is managed per council's investment policy, which seeks to earn the best return on funds, whilst minimising risk.

19. Borrowings

Whilst not a source of income, borrowings can be an important cash management tool in appropriate circumstances. Loans can only be approved by council resolution. The following financial sustainability principles underpin new borrowings:

- Borrowings must only be applied for where it can be proven that repayments can be met in the Long Term Financial Plan
- Borrowings must not be used to fund ongoing operations
- Borrowings are appropriate for funding large capital works where the benefits are provided to future generations.
- Council will maintain its debt at levels which are sustainable, with:
 - indebtedness <60 per cent of rate and charges revenue, and
 - debt servicing cost <5 cent of total revenue (excluding capital revenue).

20. Document History

Date approved	Change Type	Version	Next Review Date
29 June 2021	New Legislative Requirement	2	June 2025
