

IMMUNISATION INFORMATION FOR ENROLMENT AT KINDERGATEN

Does my child need to be immunised to attend kindergarten?

Yes. For your child to be able to start kindergarten, you are required to provide an up-to-date Immunisation History Statement that shows your child is not overdue for any vaccinations.

When is a child considered overdue for a vaccination?

A child is considered overdue for a vaccination if four weeks has passed since the date of the 'next vaccine due' listed on their current immunisation history statement.

Who do I give the Immunisation History Statement to?

Council Managed Services – If your child will be attending a Council Managed kindergarten, a copy of your child's Immunisation History Statement can be uploaded when completing the Child's Enrolment Record, or can be given to educators at the kindergarten before they begin.

Independently Managed Services – If your child will be attending an Independently Managed kindergarten, the service will reach out to you directly on how to provide this information.

Can I show you my child's health book instead?

No. An Immunisation History Statement from the Australian Immunisation Register is the **only** form of documentation accepted for enrolling in kindergarten.

Where can I get an Immunisation History Statement?

- Visit your local Medicare or Centrelink office.
- Contact the Australian Immunisation Register on 1800 653 809
- Login to your MyGov account to download a copy

My child was immunised overseas, what do I need to do?

Children who were immunised overseas must have their vaccine records assessed by a GP or local council and be offered catch-up vaccinations as required. The GP or local council will then report overseas vaccines to AIR by submitting the AIR Immunisation History form. After this is done you can request an Immunisation History Statement from the Australian Immunisation Register.

Families will need to have overseas immunisations translated into English.
