KINDERGARTEN PHILOSOPHY

RELATIONSHIPS

Children are at the heart of our practices in City of Casey managed kindergartens. Teachers and Educators nurture inclusive and culturally safe learning spaces through kind and thoughtful practice, helping children and families build connections, friendships, and a sense of belonging.

WAYS OF BEING

We create partnerships with children and families, building strong relationships, supporting wellbeing and empowering children to be resilient, active citizens whose voices are heard and valued. Children, families and community members are respected for their diversity and empowered to participate meaningfully.

CONNECTION

We recognise the traditional custodians of the land on which we work, live and play. We acknowledge the Boonwurrung country and connect this culture to place based-learning. This connection deepens our understanding of sustainability and our shared responsibility to care for Country.

QUALITY LEARNING

Children are supported to play and learn in high quality settings. Our learning environments are purposeful and well-resourced, brought to life by the teaching teams, children and families. Through safe secure and connected practices we inspire, teach and ignite a passion for learning. Educators recognise children as capable learners. Children learn to care about our future through appreciation of the world around us and by engaging in sustainable practices that nurture respect for the environment.

LEADERSHIP

Our professional educators are committed to delivering high-quality programs that enrich the daily experiences of children, families, and the broader community, supported by a dynamic management and governance structure.
