FOOD & GARDEN ORGANICS OR 'FOGO' BIN

Maroon bins with green lids are replacing the maroon food and garden bins as they get damaged or wear out.

Scan the QR code to access the full list of items and how to best dispose of your waste.

Check the packaging before putting an item in any bin.

All compostable or biodegradable packaging needs to go in the rubbish bin. Our composting contractor cannot accept any bags or packaging due to the time it takes to break down. This material affects the quality of the finished compost sent to farmers.

WHY WE RECYCLE GLASS

Glass bottles and jars can be recycled
endlessly into new bottles and jars when
collected separately.

Recycling glass reduces the need
for virgin raw materials, saves energy,
and lowers greenhouse gas emissions.

Cleaner recycling streams mean less
recyclable material is lost and sent
to landfill.

Cleaner recycling streams increase
the value of collected materials across
the system.

The glass recycling service has been introduced to meet Victorian Government
requirements for a standardised four-bin waste and recycling system.

Find out more at casey.vic.gov.au/kerbside-bin-changes.
